

Make the world a better *place*-- Starting with *yours*--

We all need to do our bit to help the environment.
And we'd all like to save money on energy and water.

But where do you begin? **How does your place rate?**
What's the most effective way to make a difference?
And how do you take advantage of the many rebates
and incentives on offer?

GreenHats has the answers.

Let's think
about the built
environment

As householders, the homes we live in and the ways we live in them provide a considerable opportunity for reducing our impact on the environment.

There are many tried and tested ways to make our homes **more energy efficient**--reducing our carbon emissions and greenhouse gases. And many of these home improvements can be achieved through **low-cost or no-cost** measures.

It's not just about improving our world environment--it's also about improving your home environment.

GreenHats can help you and your household to help the environment and save money, living more sustainably and more comfortably.

We look forward to putting the green hat on your home.

By making your home more sustainable, you can **save money** and **live more comfortably**, all year round. And, given Queensland's climate, that makes a lot of sense.

As a nation, by **improving our built environment**, we can achieve emission reductions and live more comfortably and economically in one of the driest, harshest continents on earth. So **let's put on our green hats** and think about our built environment.

You can make the world a better place--starting with yours. And **GreenHats** is here to help.

How GreenHats thinks about your home

GreenHats can suggest a range of small changes that could make a big difference to your water and energy bills, and the year-round comfort of your home.

-- GreenHats conducts **home sustainability assessments** in Brisbane for the Australian Government's Green Loans program--**currently free**.

-- GreenHats can help you to understand and make the most of the many **rebate, concession and incentive schemes** available.

-- GreenHats can recommend the most effective **solutions for retrofitting your home**, and then take care of supply and installation --doing away with the confusion, and saving you time and money.

-- GreenHats is building on its foundations to be the first Brisbane company to deliver **building energy star ratings** for residential and commercial properties.

By 2011, all homes for sale or lease will need to display an energy efficiency rating.

For commercial buildings, this comes into effect in 2010.

You can lead the pack and be the first on your street to display an energy rating.

--
By 2011, all homes for sale or lease will need to display an energy efficiency rating.
--

The Department of Environment Water Heritage and the Arts is helping householders to make their homes more sustainable by offering a **free home sustainability assessment** and **subsidies on green loans** to implement changes.

GreenHats has been **contracted by the Department** to conduct the assessments for interested households in Brisbane.

The assessment is free to householders and available for multiple properties owned by an individual.

The free home sustainability assessment is a great way to **get some ideas** on making your home more comfortable and efficient.

It's not a "test" of your lifestyle, but a **friendly, expert assessment** of how you can live your life and do the things you do in a more sustainable way.

See GreenHats.com.au for some great tips on living more comfortably and efficiently.

HOME SUSTAINABILITY ASSESSMENT

--
-FREE-
--

\$250 VALUE FOR A LIMITED TIME ONLY

--
Having a home sustainability assessment is the first step towards applying for a green loan.
--

-- RENTAL TENANTS --

Let your landlord know how to make their property more comfortable, efficient and cost effective.

-- LANDLORDS --

Make your investment property more economical to operate and attractive to tenants by implementing changes with the support of a green loan. There are many rebates and tax incentives available.

-- HOMEOWNERS & FAMILIES --

Reduce your energy consumption, increase your home comfort, and save money on energy and water rates. There are many rebates and concession schemes to reduce the cost of implementing sustainability measures for residential homes.
